PERSONAL PROJECTS

Portfolio

- My online portfolio.

Bombard

- A maze escape game based off Bomberman, where the user has to exit the town avoiding being bitten by angry dogs and making their way by destroying blocks. In the PvP mode, both players fight to death with the help of random cards. Developed with HTML canvas and Javascript.

Hoodie

- A mobile application that allows the users to post comments on a map. These comments can be made public or private, allowing the user to interact with other user comments replying or liking them.

Paintapop

- A mobile application that allows users to trade painting services. The user can browse and post cards showing their style, connecting with the card's creator with a chat.
